

Dear all

We all know that study is a continuous process not only in our 3 hours' lecture, thus we provide some suggestions for a better preparation about ERM.

- a) Our group has already uploaded some documents' links on toyhouse, you had better read it and have a general understanding for some fundamental concepts about ERM and OOM.
- b) You can know of the entity, attribute and relationship after reading the documents, then you had better think about the entities and attributes in our project work, for example, we will think about the Q&A platform.
- c) On our lecture day, we will give every group a chance to draw your own EM diagram and display it to our whole class. Sincerely hope you all support our work and wish we learn more about ERM.

If you have anything unapprehending, contact with us!

Wish you have a perfect weekend!
